

CORE TablePoint

Battery Powered Table Light

CORE TablePoint

Premium lamp solution for events firms, hotels, venues, restaurants, bars & marquee tent hire firms to illuminate dining tables, occasional tables, and even standard lamps and lanterns.

With battery power there are no cables to the lamp. It also has wireless dimming, magnetic base, multiple colour LED output and IP65 rated for outdoor use.

Ideal for lighting table-centres, art pieces, enhancing artefacts, or simply providing quick and easy task lighting. Much faster setup than traditional mains cable lighting, introducing new levels of control using Bluetooth/mobile app or a simple lighting desk with WirelessDMX control.

With its magnetic base the lamp can be attached using its own fittings inside a table or standard lamp or attached with the magnet to a steel surface (staircases, railings etc), indoors or outdoors.

On a single charge the unit runs over 8 hours at full power. After use it can then be dropped into a charging case with other units ready for next use.

KEY BENEFITS:

- High intensity coloured light output on RGBW, or shades of white from very warm to cool
- Enhances a table centre when placed inside a table lamp of your choice
- Simple patented mechanical attachment to fit most lamp fittings
- Allows a lamp to be placed literally anywhere with no cables & wireless control
- Lithium battery lasts longer than most events at 8-10 hours minimum
- Charges in only 5 hours for same-day turnaround on charger
- Aesthetically designed housing to complement the most exclusive surroundings
- Fast attachment with strong neodymium magnet or onto a screwhead spigot

LIGHT HEAD:

- Over 600 lumen LED wash from the bulb head in RGBW colours or warm whites
- Dimmable light output for more atmospheric surroundings or longer battery life
- Light is focused inside of the lamp shade & down onto the table surface around 360 degrees

CONTROL:

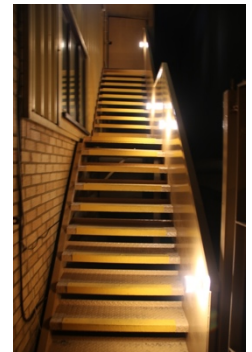

- Simple operation by any user from the pushbuttons or mobile phone app with Bluetooth
- Greater control for professionals – using lighting desk with Wireless DMX transmitter (W-DMX)
- Phone app means no lost remote handsets and wireless means no need to be in view of each unit

POWER:

- Lithium ion battery – same technology as used in CORE's entire range of lighting
- Charging individually, in case of 10 units or crate of 6 units. Attaches with magnet to base

MOUNTING:

- Attach with magnet, screw onto M10 spigot or using patented fixings for insertion into a lamp
- Attach magnet to pipe & drape clips or suspended ceiling 'scissor' clips
- Under 500g weight
