

Flood30

Portable Battery 7500lm Floodlight

High Power LED Rugged IP65

FLOOD30 is an extremely high-brightness, battery powered LED illumination unit, fully rated for outdoor use (IP65) with highly powered neutral white LEDs. At over 7,500 lumens equivalent to 750W tungsten halogen the FLOOD30 is designed for instant illumination anywhere. It can be powered or charged from mains, all in a compact 25cm cube rugged case. The head folds flat with lens protection and strap option for carrying; the head may be pole mounted on the base unit or off the unit with multiple accessories.

CORE Lighting Limited

Compact size with tilting/closing head

Key Features

- Extreme white LED output 7500 lumens (750W Tungsten equivalent)
- Fully sealed IP65 for heavy weather & **very small 25cm cube** rugged case
- Long usage life 2 ¾ to 30 hours, depending on battery version & setting
- AC Mains operation on 80% Output
- Lithium battery options OR Sealed Lead Acid battery
- Removable head for mounting on attachable poles or tripod
 - ❖ Optional 3.5m tripod or 0.75-2.0m poles plus carry strap or bracket
- Head closes onto body for ruggedness, protection & portability
- HD camera friendly on full brightness

Removable Head. Attach to poles or accessory

Portability & Simplicity

Simply plug in to charge, unplug once finished (up to 4 hours) then switch on. Or trickle charge from vehicle power adaptor.

A selector switch controls intensity. Diffuser lenses may be added to widen the beam from narrow spot 22 degrees up to wide angle 60 degrees.

Pole option lifts head 1.2-2m: undo head, push in pole, re-attach head, tighten and switch on. Cable is integral to the pole so no external cable.

Multi-Purpose

As a stand-alone unit or combined with accessories FLOOD30 is suitable for many lighting applications such as scene or scene of crime illumination, pathways, building illumination and also as a backup lighting system for power dropouts.

It may also be run from 110/240V AC power to provide an energy efficient lighting source when power is available using 1/7th the energy consumption of halogen.

FLOOD30's rugged design means it may be stored in the boot of a car, service vehicle or multiple units in a flight case. They can be charged from a mains connection in just 4-6 hours depending on battery option.

The attractive neutral white LEDs (4000K CCT) give the output a pleasant but highly functional task lighting for a wide variety of applications without the "cold blue hue" of traditional LED lighting.

High Intensity for large scale scenes
Trees over 100m away

Light Head

- White LED Head using highest quality Cree high-brightness LED chips, Neutral White 4000K CCT
- LED output to over 7500 lumens providing an intense brightness at 100W consumption
- **Pole system** accessory available in sections of 0.75m up to 2m. Attaches to base, head mounts on top
- Simple up/down intensity selector & LED display showing light intensity or battery level meter
- Head tilts vertically from closed to 180° vertical for uplighting
- Standard 22° LED narrow beam. Diffuser overlay with angles 30° (medium), 60° (wide). Others available
- Connector into main body allows head to be mounted off-chassis or alternative heads to be connected
- Optional accessories available to mount head on wall, tripod or anywhere using extension cables.
- Convection cooled – no fan minimising noise & maintenance. LED Lifespan >50,000 hours

Power Source

- Can operate from battery power at 100% and from mains 80-240V/50-60Hz at 80% output
- Continuous battery operation on dropout of mains supply for backup lighting
- Full charge time only 4-8 hours depending on battery. Three options with run times:
- 26Ah SLA for lower cost, 2 ¾ to 20hrs (13Kg); 36Ah Lithium Ion, 5 ½ to 30hrs (9Kg);
- 32Ah Lithium Iron Phosphate, 5 to 25hrs (10Kg) for longer service life.
- Operating temperature -20 to +50 deg C.

Mechanical & Accessories

- IP65 (Totally protected from dust & low pressure jets of water)
- Rugged powder coated aluminium housing and head
- Optional 0.75-2.0m interconnecting poles to mount head off body
- Optional 2.5m or 3.5m tripod with cable extensions
- Optional floor/wall plate head mounting accessory
- Lock and/or chain through handles for security (not supplied).
- Weight according to battery (see above). Dims 250w x 255d x 230h
- **6Way flight case/charging option** - 85Kg loaded (Lithium Ion version)

Head mounted off base pack with integrated pole or tripod

Compact 25cm cube; head stows on top of unit for protection making this a rugged package during storage and transport

Carry strap & poles transform the unit into a portable worklight

Power and charging accessories from 12Vdc for vehicle charging to 110/240Vac mains supply /charging
