

Sheringham Park | National Trust

In November 2018 Sheringham Park had their Repton bi-centenary Celebrations. The event was all about light, beauty and transformation, celebrating the life and work of Humphry Repton. It lasted 7 days in total. During the event there was music, entertainment, food and drinks and of course spectacular light installations.

Several parts of the park were illuminated by CORE ColourPoints and ColourPoints Mini.

About Sheringham park

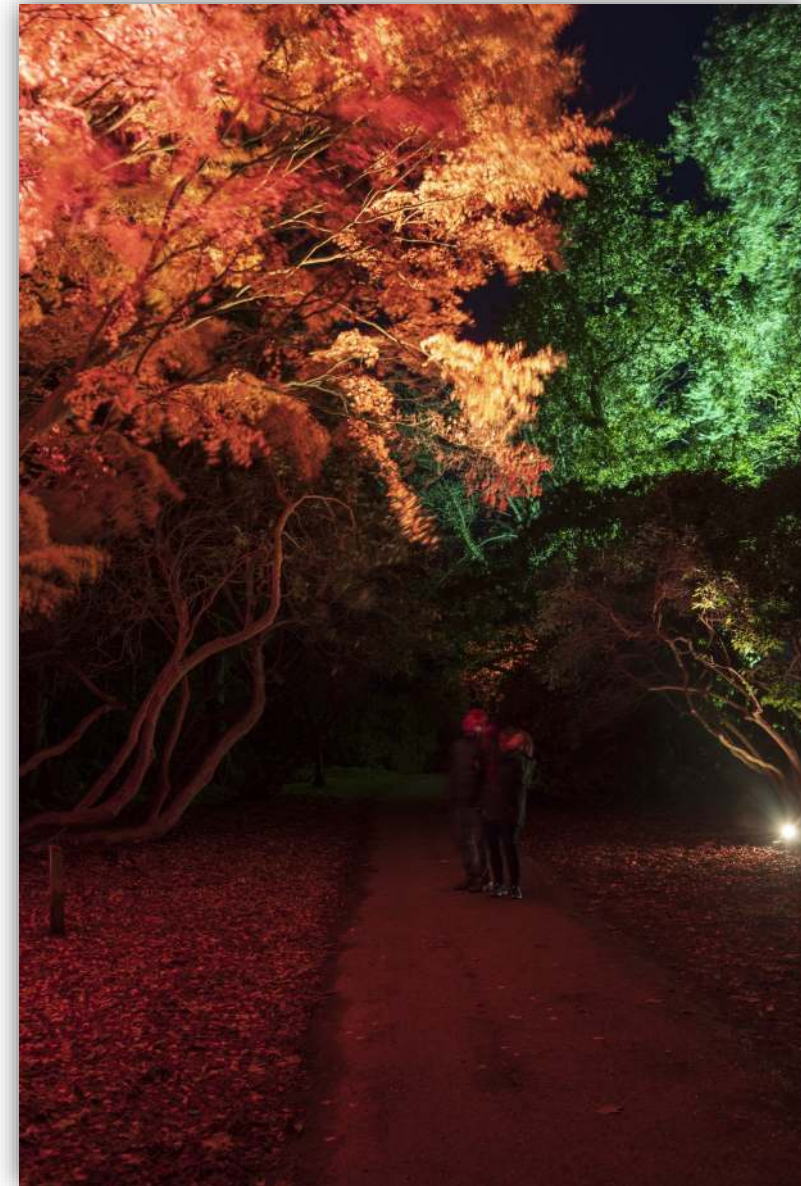

Sheringham Park is under the control of The National Trust. The National Trust looks after special places throughout England, Wales and Northern Ireland for ever, for everyone. Sheringham Park is seen as the most complete, best preserved, example of Humphry Repton's work. He was commissioned by Abbot Upcher in 1812 to remodel the Sheringham landscape, presenting his proposals in his trademark Red Book. Successive generations of the Upcher family continued to develop the estate broadly following Repton's design.

Why CORE Lighting was present at Sheringham Park

The Repton bi-centenary Celebrations of Sheringham Park was the perfect place to test the capability of our improved products. We were also able to display our improved products to a large audience at Sheringham Park. Visitors found it astonishing that our products were able to illuminate such high trees. The various colour settings, used on our products, created special images.

Meet us

Any venue, any occasion

We have been manufacturing, designing and innovating CORE Lighting products for over 10 years now. All of our products are fully weatherproof and battery powered. Our wide range of products are all quick and easy to setup and offer a vast amount of LED Lighting for any venue and any occasion.

Whether you are looking to add ambience to a momentous event or light up a stately home, CORE Lighting has the right wireless LED battery powered spotlight, floodlight or uplighter for you.
